

## Troubleshoot

### # Troubleshooting Guide

#### ## Web App Not Starting

- Ensure `uvicorn` is installed
- Use `uvicorn web.main:app --reload`

#### ## Script Not Executing

- Confirm script has `.py` or `.ps1` extension
- On Windows, allow PowerShell execution:  
``powershell  
Set-ExecutionPolicy RemoteSigned -Scope Process  
``

#### ## Database Not Creating

- Delete `data/ai\_assistant.db` and restart
- Check file permissions in `data/`

#### ## API Keys Not Working

- Set keys in the `integrations/\*.py` files
- Verify network/firewall access to APIs
